

Pilkington Profilit Data Sheet

Product – **K32 Single LI**

Pilkington Profilit™ is a U shaped profile glass. In standard configurations it is set within a perimeter aluminium frame in singular, double or triple glazed format. The modular nature of the system renders it a flexible design component perfect for inclusion within both exterior and interior projects.

Profile Dimensions

Weight = 18.2 kg/m²

Maximum panel length = 7m

Number of longitudinal wires at 25mm centres = 10
optional

Glass Range

Low Iron Pilkington Profilit™ glass is available in various aesthetic finishes and ornamentations such as Cast, Clear, and Sandblast. Unwired glass can also be toughened. Feasibility of glass types as well as their associated performance figures should be discussed with our technical team.
